

Name: Vignesh S

Regno: 192325002

Experiment: 29. Implement an Eye detection algorithm using Open CV to detect and locate human eyes in the images.

Code:

```
import cv2  
  
i = cv2.imread("face.jpg")  
  
g = cv2.cvtColor(i, cv2.COLOR_BGR2GRAY)  
  
ec = cv2.CascadeClassifier(cv2.data.haarcascades +  
    "haarcascade_eye.xml")  
  
e = ec.detectMultiScale(g, 1.3, 5)  
  
for (x, y, w, h) in e:  
    cv2.rectangle(i, (x, y), (x+w, y+h), (255, 0, 0), 2)  
  
cv2.imshow("Eye Detection", i)  
  
cv2.waitKey(0)  
  
cv2.destroyAllWindows()
```

Input and Output:
